Art Unit: 1745

1. Claims 1-12, 25-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.
2. Claim 19 is objected to because of the incorrect labeling units found in the last line of this claim.
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 20-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of claims 20 and 22, there is no antecedent basis for "graphite powder". Claims 21 and 23, dependent on claims 20 and 22, respectively, fall therewith.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 13-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Takami et al. - US 5,340,670 (Takami).

Art Unit: 1745

Reference is made to column 2, lines 3-28 of Takami along with column 5, lines 50-64; column 12, lines 10-31; column 16, lines 17-64 and Example 27. Takami specifically recites the hexagonal crystal structure of the graphite negative electrode. As is well known in the art, there is at least a 3% amount of rhombohedral crystal structure present in this hexagonal graphite crystal negative electrode, which amount meets the claimed amount. In addition, it is inherent in the teachings of Takami that the capacity for the graphite crystal powder would be at least 320 mAh/g because this reference teaches the same material so that its capacity would be the same as that set forth in the present application.

7. Claims 13-16 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Flandrois et al. (Flandrois)

See the Abstract to Flandrois along with column 1, lines 27-40; column 5, lines 5-13 and column 5, line 61 through column 6, line 20 and Example 3.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on Monday-Thursday from 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 703-308-2383. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
